1. Executive Summary

As a conservative investor with a 5-year investment horizon and a budget of ₹30,000, your primary objective is capital preservation coupled with steady, moderate capital appreciation. To adhere to conservative risk guidelines, equity exposure is capped at 40%, with the remaining 60% allocated to secure, low-risk debt or liquid assets. This report evaluates Reliance Industries (RELIANCE.NS) and Tata Consultancy Services (TCS.NS) and presents a tailored asset allocation strategy.
